

## **Minutes of Meeting**

February 19, 2019

3pm – 8pm

### **Members:**

*Present:* Jerry, Sangeetha, Sibendu, Tarun, Virat

### **Previous Meeting:**

*Date:* February 17, 2019

### **Proceedings:**

- In the previous meeting, an analysis of the JIRA tool was made and the list of items that are to be completed by the end of the first sprint was documented.
- The agenda of this meeting was to come up with the UML diagram of the items that or of major importance which will provide the basic structure of the application.
- A few corrections that were present in the document sent to the TA about the items to be done in the sprint 1 were made.
- The list of items that were to be showcased to the TA on the sprint meet were separated into Grade B and Grade A items, where Grade B items were the items that had to be showcased and the Grade A represents the extra items.
- Issues in setting up the Prattle server were addressed and was further ensured that every member of the team has the Prattle server deployed in his/her local machine.
- The list of features documented from meeting 1 was used to come up with the UML diagram.
- The UML diagram mainly represented the various entities and the relationships with various entities. The UML also had the exact attributes that each entity is going to have and the list of methods that each entity will implement.
- A rough idea of the database structure based on the UML diagram was also articulated.
